Commissioner for Patents

The IDS filed 2/22/05 has now been considered. Morabito ('475) does not disclose polymers having properties as described by Applicant. For example, there is no disclosure or suggestion in Morabito of a polymer possessing a crystalline melting point or tensile storage modulus as required in all the present claims.

A copy of the initialed, dated, and signed IDS is attached. It is noted that the present claims remain allowable for the reasons of record
